

Online astronomy workshop for teachers

Is astronomy part of your school curriculum but you feel uncomfortable teaching it to your students? Would you like to feel more confident and better prepared to answer the many questions you students may have?

If so, then this workshop is for you!

- When?** November 12 to 30, 2012 (about 3 hours/per week)
Where? Anywhere you have access to high speed internet!
How much? It's free! All you have to do is go to our website to register.
For who? Teachers of grades 5 through 9 across Canada.
How? There will be a weekly live videoconference where you will learn about many astronomy topics. You will also have activities to do on your own and you will be able to interact with others using the forum.

www.discovertheuniverse.ca

At the end of this workshop you will...

- be more familiar with many astronomical topics in your school curriculum;
- have interesting activities ready to use in class;
- have access to teaching material adapted to your class;
- be more familiar with the sky through observations made during this workshop;
- have discovered some tricks and tips which will help you teach astronomy;
- overall feel better equipped to teach this fascinating subject to your students!

Come discover the Universe with us!

This workshop is offered by:

Canadian Astronomical Society

Royal Astronomical Society of Canada

Additional funding by:
